PROFESSIONAL SUMMARY

Program and operations manager with 3.5 years at Koloapp Technologies (Kolo), a venture-funded home-construction tech startup, working directly with the founders. Runs the pre-sales, consultation and webinar programs end to end: process design, team leadership, KPI reporting, root cause analysis and workflow automation. Builds operational systems without engineering support and turns funnel data into decisions that lift show-up rates, conversion and team productivity.

CORE COMPETENCIES

Program Management · Operations Management · Process Improvement · SOP Development · KPI & SLA Management · Root Cause Analysis · Data Analysis & Reporting · Workflow Automation · Stakeholder Management · Cross-functional Collaboration · Team Leadership · Capacity Planning · Vendor Evaluation

PROFESSIONAL EXPERIENCE

Program Manager — Oct 2024 – Present

Koloapp Technologies Pvt Ltd, Remote

- **Program ownership:** Own the pre-sales and expert-consultation program end to end (lead intake, a 3-question qualification framework, booking, reminders, follow-up and conversion tracking) across sales, advisors, product and marketing.
- **Process & SOPs:** Wrote the company's first SOPs for customer support, refunds, fraud investigation and content moderation; designed 2 new processes and optimized 1, cutting execution errors by 15%.
- **Team leadership:** Led 3–5 operations professionals and 6–8 calling agents (onboarding, rosters, shift planning, weekly reviews, coaching), improving team efficiency ~25% and dialer connectivity 10%; ran fraud operations at 95% resolution.
- **Root cause analysis:** Analyzed consultation no-shows and found ~70% of recorded no-shows (36 of 52) were stale CRM statuses, and that same-day bookings showed up at 70% vs 29% for bookings 2+ days out; moved the booking window to the next working day and added automated confirmation calls.
- **Reporting & dashboards:** Built the reporting leadership uses daily: a registration → attendance → consultation → conversion funnel, cohort analysis across 28+ webinars, and automated mid-day and end-of-day team reports in Slack and Google Sheets.
- **Automation:** Shipped 30+ production workflows on n8n, WhatsApp Business API (WATI), Google Apps Script and REST APIs (lead sync, CRM updates, Slack alerts, reminders), including 3 WhatsApp bots and AI support summaries; migrated Zapier to n8n.
- **Booking system:** Built a self-serve consultation booking system (live Google Calendar availability, auto-booking, WhatsApp reminders, CRM logging), replacing manual scheduling for 3 advisors.
- **Event operations:** Ran 22+ webinars with 4,100+ registrations end to end, raising attendance from ~35% to a peak of 71% by re-sequencing multi-channel reminders.
- **Vendor evaluation:** Built cost models for an AI voice-calling agent (build vs. buy) and WhatsApp calling for international leads (~90% cheaper than ISD) to guide tooling decisions.
- **Social media:** Ran organic LinkedIn, Instagram and X; grew LinkedIn impressions 823% in month one and reached 170K+ Instagram views a month with no ad spend.

Customer Support Representative — Apr 2023 – Oct 2024

Koloapp Technologies Pvt Ltd, Remote

- **Account management:** Managed 20 paid B2B partner accounts through check-ins and escalations, and fed partner feedback into roadmap reviews that led to 3 shipped feature improvements.
- **Support operations:** Ran omni-channel support (chat, email, phone, WhatsApp) at 95% CSAT and cut average response time by 40% by redesigning ticket triage, response templates and escalation flows.
- **Customer insights:** Turned 500+ customer interactions into product insights that contributed to a 12% lift in notification CTR; owned refunds and SLA compliance on Freshdesk, WATI and Gupshup.
